SUMMARY

I'm a passionate programmer with a strong foundation in full-stack development. I have experience with technologies such as React Native, and React.Js. I like solving real-world problems using technology and am constantly looking to expand my knowledge and skill set. At the moment, I'm searching for chances to put my knowledge to use and help out on exciting projects.

PERSONAL PROJECT

Reha Events (07/2025-09/2025)

Description: Reha is a platform that helps underdog musicians and poets gain a stage and audience. It is a monthly program but is evolving into a full-stack event management platform that allows users to create, manage, and promote events with integrated ticketing and real-time updates.

- Technologies: eact.js, Next.js, Radix UI, Tailwind CSS, shadcn/ui, Hostinger Horizons, Vercel
- Role: Full-stack
- Link: [GitHub](#)
- Link: [Live Demo](#)

IDNET (09/2025 - present)

Description: Ongoing development of the ID NET learning and agent management platform.

- Technologies: React Native (mobile), Next.js (admin web app)
- Role: Full-Stack

Healthy HMS (11/2025 - present)

Description: Healthy HMS is a scalable, modular hospital management system built with a clean architecture approach. It includes EMR/MRS features such as patient management, lab workflows, authentication, audit trails, and more.

- Technologies: Node.js, Express, TypeScript, MongoDB, Mongoose
- Role: Full-stack
- Link: [GitHub](#)

Experience

Role: Full-stack
Company: Birrama digital commerce
07/2025 - Present

Achievements/Tasks:

Collaborated on full-stack projects integrating Node.js and Express.js with SQL and NoSQL databases.
